Architectural Quality Manufactured in North America

- Artec LED Handrail places light exactly where required, complimenting architectural design without sacrificing safety and efficiency. The linear LED Handrail solution, delivers functional illumination suitable for indoor and outdoor applications.
- Cool to the touch, safe low voltage and providing consistent colour temperature.
- Recessed LED luminaire provides a complete metallic look while not in use, matching non-illuminated handrail and reducing potential light distraction making it the preferred solution for pedestrian overpasses, and transit applications.
- While Artec LED Handrail provides an impressive 100,000+ hour life (L70), the added features of quick connect, plug and play adapters make removal and potential maintenance easy without compromising handrail installation. Artec LED Handrail comes with an optional stainless steel locking spring clip providing added security and vandal resistance.
- Flexible specification allow for both, with or without metal component allowing for separation of trades, removing job site complexities, and ensuring matching non-illuminated handrail throughout.

FEATURES & BENEFITS:

- **Manufactured in North America**
- 100,000 + Hour Life (L70)
- Remote Power Supply
- 24 Volt DC
- Safe low voltage operation
- Easily maintainable, and removable without compromise
- Vandal Resistant
- Optional Stainless Steel locking spring clip mounts
- Dimmable (Optional)
- **Consistent Colour Temperature**
- Suitable for custom length handrail sections
- **cUL and UL Listed**

About Artec Lighting

Artec Lighting Products Inc. initially established in 1996 as a lighting agency to represent leading US and Canadian manufacturers of commercial and architectural lighting in the Greater Toronto Area. Artec now focuses on providing its own brand of high quality ancillary LED products for Commercial and Architectural applications. Artec Lighting Solutions (a division of Artec Lighting Products Inc.) maintains representation of a small portfolio of specialty lighting manufacturers to assist your project, as well as, local lighting engineering services, custom product design, photometrics and spacial analysis.
